

The ability to work with Energy, Frequency and Vibrational at Long Distances.

The Tesla's Next Gen technology has a method of easing energy at a distance using the unique Neutrino's in its Field. Its extra-sensory faculties are amplified by placing a personal physical item such as hair and a photograph of the person or animal in the centre of its device.

The Tesla's Next Gen technology can be any of the following: Tesla's Starhenge, Tesla's Light Chamber, Tesla's Vortex Chamber or any of the 4 Transcender family of mats.

A snippet of hair from the person or animal acts as an antenna and is a link between the Tesla's Next Gen and the individual. It is interesting to note that Crystals have the power to receive and transmit energy waves. The earliest radios used quartz crystals and were called "crystal sets." The main composition of quartz crystal is silicon. Silicon is also a key mineral found in the hair, and undoubtedly contributes to its antenna ability.

It is no accident that silicon is also the most essential component of computers; silicon enables computers to have mind-like properties including "memory." Silicon is also an important mineral found in the brain, which is the connection to the mind. Silicon is what gives an iridescent sheen to some fruit such as strawberries and cucumbers. It is also found in whole barley and oats.

The Tesla's Next Gen operates on principles based on Quantum Physics, and the subtle energy auric fields which are undetected by the normal senses which support life and are essential for life's functioning. It seems to discover the higher dimensional energetic disturbances underlying pathology and to encourage the reappearance of normal energetic fields which support health. It does not replace nor interfere with other forms of medical care but supplements them.

The Tesla's Next Gen tends to open the thought patterns to a higher vibration helping the person to make better choices for their lives. This can assist people who are depended on making good decisions such as CEOs, Business operators, Sports people, and all people who are required to make important decisions. It also enhances relationships due to a more co-operative thought process between people.

Long distance energy releasing is based on the understanding that every person's energy patterns, frequencies, signatures, vibrations, or rhythms are as unique to them as their fingerprints, and that every part of their body, down to the cell level, reflects these 'vibrations'. When illness, injury, infection, stress, pollution, malnutrition, or poor hygiene cause these patterns to become imbalanced or interrupted, then the energy is altered. This altered energy pattern can be read from any part of the body and brought back to balance by the Tesla's Next Gen. Its ability to send frequencies to the body in order that the body may adjust itself through the restored flow of energy is unique.

The Tesla's Next Gen can work at a deep spiritual level by tapping into dimensions that are beyond the Physical Plane. It is in these higher dimensions that the origins of all experiences in the Physical Plane are thought to originate. The basic theory and practice is the concept

that man and all other life forms share a common ground in that we are all bathed in the electro-magnetic and other energy fields not only of the earth but of the entire Universe called Ether or Morpnic Fields. Each life form has its own electromagnetic field which, if sufficiently distorted, will result in disease of the organism.

The Tesla's Next Gen effectiveness is independent of the distance between its location and the person it is working with. Distance is not a limitation. The person can be in the Tesla's Next Gen technology, in the next room or a long distance away.

The Tesla's Next Gen technology may be of value in situations where conventional medicine has little to offer and can be helpful in a wide range of conditions and surprising situations including Animals, Soil and Crops.

The Tesla's Next Gen is also a useful supplement to other complementary and Subtle Energy therapies especially Homeopathy, Acupuncture, Reiki. It can work with any type of energy blockages through the auric fields, although medical emergencies and life-threatening illnesses or injuries should always be treated by a medical doctor.

The beauty of the Tesla's Next Gen is that it is non-invasive. It can be used to compliment other forms of therapy, and its efficacy is such that it forms a complete system of balancing energy in its own right. It seems to know at what level to work with you on, Physical, Emotional, Spiritual or all three. This is why it opens the thought patterns to a higher vibration helping the person to make better choices for their lives.

Often times, emotional factors that neither the person nor other health trained people suspected might show up and be brought to the persons attention as the underlying cause of an illness. At first this might create a slight aggravation for the person as they believed they had dealt with a particular situation. It will only be brought to the person's attention if it is stopping the person from releasing and balancing their energy. The aim of the Tesla's Next Gen is to isolate these factors, prioritize them, and then embark on assisting the correction or "balancing the person" with the needed frequencies. Priority correction or harmonization is the key to a balanced life.

The Tesla's Next Gen works with a higher power in the projection of balancing energy patterns. You may add pure essential oils, the signatures of homeopathic remedies, colours, flower essences, gem elixirs etc. But this should be done only with a knowledge of the persons, animal or situations needs.

One of the cardinal Quantum principles is "Interconnectedness." The nature of the energetic processes in the Tesla's Next Gen is not yet fully understood, but there is now ample evidence that we are all linked in some way at higher levels and dimensions of the Universe. At least ten dimensions have been theorised not only by physicists such as Dr William Tiller, Dr Ervin Laszlo, Dr Dean Radin, Dr Glen Rein but by ancient wisdom including Kabbalah. It is believed that some of these levels are engaged during any kind of Subtle Energy practice and even in cooking, eating, sex, dance, singing and chanting.

The Tesla's Next Gen Balancing is not so much directed at the physical reality of the body, but rather at the invisible energy matrices which are believed to lie behind it. Some consider these higher dimensions to be the truer realities and the Physical Plane to be metaphorical illusory shadows. The Tesla's Next Gen appears to act outside of the normal space-time

matrix, as do 'non-local' interactions such as the "Einstein-Podolsky-Rosen Experiment" described by modern physics.

One of the great things is that the Tesla's Next Gen does not need the input of a therapist or a practitioner to tell it what to do or how to work. This makes it very unique in the natural healing world. Unfortunately, many people who work with energy healing modalities often die prematurely of the same conditions that they specialize in treating. Many other healing practitioners and psychics have encountered unfortunate fates related to financial, health, legal, relationship or other issues. Thankfully this is not an issue with the Tesla's Next Gen Technologies.

People who own Tesla's Next Gen technologies are trained to assist people in the use of the Tesla's Next Gen that helps restore the balanced health of people, animals, plants and the soil wherever in the world that need exists, and with no depletion of material resources.

It is recommended that you have at least five sessions in the Tesla's Next Gen technologies whether it be in person or remotely. This can be spread over two to five weeks. We have found though spread over three weeks is the optimal time. Overnight remote sessions are possible as well but may invoke a lot of dreaming while sleeping.

What is needed for a remote session:

- A photograph with the person's signature and date of birth written on the back.
- A lock of hair (30 strands or more) at least an inch or 25mm long. The hair needs to be placed into an envelope and sealed with the person placing their full signature on it with their date of birth. It is best when the hair is cut by another person that it falls directly into an envelope without them touching the hair. If you are cutting the hair yourself, you can touch it.
- Once you have the envelope and the photo please wrap in alfoil and give it or send it to the Tesla's Next Gen facilitator with your payment and the dates you would like to have your sessions.

In the case of Animals, do the same as above except you write their details on the envelope and photo. When you are wanting to heal a property or clear the energy of a house you need a photo with the address details and a little bit of soil if possible, in an envelope.

It is a good idea to make a note of your present state of health and thinking patterns so that you can compare them after your remote sessions.

For more information please contact:

Chris Lewin,

Golden Pathways To Harmony,

info@gpth.com.au

M 0409 055 816

Remote sessions vary between \$60 to \$100 per session
