

Small 5G Oyster

The Small 5G Oyster is made from 2 specially developed 1.2mm 14sided plates.

The energy from the Small Oyster covers an area of $\frac{1}{2}$ htr (1 $\frac{1}{4}$ acre) & 12 stories (6 floors up 6 floors down).

NB. The Small 5G Oyster will cover this area if it is positioned correctly, ie

- The Small 5G Oyster must not be placed directly on metal.
- The Small 6G Oyster produces a specific energy (non- Hertzian) which alters the frequencies from:
 - (a) M/Phone towers (Microwave signal), (b) Satellites,
 - (c) Radar and High Voltage power lines to biologically compatible.
- In the process of doing this, the Small 5D Oyster also energises plant & animal life .
- Office workers are calmer/more amiable.

Large 5G Oyster 14s L5GO.

The Large 5G Oyster is made from 2 specially developed Large 1.2mm 14sided Plates.

The energy from the Large 5G Oyster covers an area of 12hct (30+ acres).

NB. The Large 5G Oyster will cover this area if it is positioned correctly, ie

The Large 5G Oyster must not be placed directly on metal.

- Large 5G Oyster produces a specific energy (nonHertzian) which makes the frequencies from:
 - (a) M/Phone towers (Microwave signal), (b) Satellites,
 - (c) Radar and High Voltage power lines to be **biologically compatible**.
- In the process of doing this, the Large 5G Oyster also energises plant & animal life.
- Three other effects of the Large 5G Oyster:
 - (a) **Plant growth** rate has improved plus the nutrient value of the plants for grazing animals has improved.
 - (b) **Bird life** has returned to areas of which they had left.
 - (c) **Frogs** that had disappeared have returned to areas where they were once plentiful & have begun to thrive once more.
The presence or absence of Frogs is a well-known barometer for the suitability of areas for human habitation
- Farm animals & people are calmer & more amiable.

General points/observations. For all Large Plates

- Avoid placing the Car Plate, L14sP/LOP, Small 5G Oyster & Large 5G Oyster directly on metal.
- With a LOP/L14sP, Small 5G Oyster or Large 5G Oyster on a property any genetically altered plants will revert back to their original patterning eg; special roses which had been genetically altered to have variegated coloured petals after their first flowering reverted back to the original stock of red, a genetically altered vine with variegated leaves with in 6 months all the new leaves went back to the original patterning.

- None of the Large Plates are affected by nylon or plastic.
- Do not place any of Tesla's Plates on the top of your head, crown chakra, it can induce a headache.
- Most people who feel the energy coming from the Large Plates as either cool or cold.
- Reiki practitioners often feel the energy coming from the Large Plates as warm.
- When standing on a LOP/L14sP barefoot, it first feels cold, then warm & when the body has drawn all that it needs at that time, the LOP/L14sP will feel neither hot nor cold.
- **When travelling with a number of Tesla's plates of any size always place them dome to concave (facing the same way) by doing this they will go to sleep & not overwhelm you.**

The Electron Stabiliser

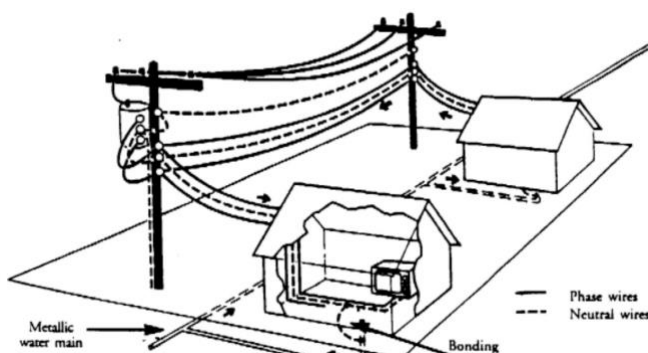

The Stabiliser's manufacture conforms to 'Australian Standards', in fact all world standards, as it does not interfere with wiring.

Man-made EMFs radiating out of all electrical wiring is chaotic. The 'Electron Stabiliser' makes the flow of electrons more coherent which causes the electrical frequency to be more harmonious with the human body. The coherent flow causes all electrical motors fridges etc, to be more efficient & quieter. If you have used a Tri-field meter to show the mG levels before installing a Stabiliser the readings will read about the same with the Stabiliser installed, use your basic Kinesiology to show the changes. Biological readings on; 'Omega Acubase' & 'Acutec Ryodoraku' (electro-dermal stress diagnostic computers), Diagnostic Micro-capillary Microscope & Kinesiology tests all show a dramatic change.

Many of the biological effects are seen in subtle changes in;
Relationships, Emotions & a quieter living environment.

The 'Electron Stabiliser' has unique titanium transceivers installed in a specific configuration within a tamperproof mixture of resin & silica; these receive & transmit photon/tachyon energy in a particular form.

Water Kit

Water & Electricity What is the connection?

Water, provided it contains any minerals or salts, is a perfect carrier of electrical waves & fields & potentially has it's own electromagnetic field around it. Distilled water will not carry any electricity or fields.

Electrical power lines lose electricity during transmission. Some of that electricity penetrates the outer layer of the earth & is attracted to the minerals & salts in underground water & to the minerals, salts etc in city water supply pipes that travel below power lines.

The Nature of Chlorine & Fluoride in Water.

The effect of the placement of a 'Tesla's Water Kit' on the water pipe is to change the ionisation of the molecules from a majority of positive ions to a majority of negative ions. Accordingly, the chlorine molecules stay as separate molecules & as such, the smell & taste of chlorine is eliminated. Importantly the water's memory of all the added chemicals is removed, this does not happen with conventional filters. The microscopic heavy metals in the water clump together making it simpler for the liver to discard. With the Water Kit fitted it puts 'life force' back into the water, the water then tastes & feels like rain water or a clear mountain stream.

What is needed for effective treatment of water?

Both an Electron Stabiliser & a Water Kit are needed for effective treatment. The 'positive ions' surrounding electrical wires within a building affect the water in close-by pipes in much the same way as external power lines affect the water in water pipes or in underground streams. If a house has its electricity earthed to the water pipes then the pipes themselves should be earthed. **Each Water Kit treats both magnetic & electrical** fields in the water. The Water Kit has an arrow pointing in the direction of the water flow. Simply place the Water Kit onto the water pipe with cable ties supplied.
