

Tesla's HeartSender

Create a state of heart-mind coherence

September 2016, in collaboration between *Tesla's*, Christopher Lewin and Connie Healbig, a new *Tesla's* device was developed.

Tesla's takes great pleasure in introducing you to;

'Tesla's HeartSender'

When sitting or standing on the *Tesla's HeartSender* your heart and mind are connected. You are in a coherent state. Your thoughts and emotions become balanced and you experience inner harmony

We call it Heart Intelligence..

What is Heart Intelligence ? It is the flow of intuitive awareness with an understanding of your inner guidance. You will experience this on the *Tesla's HeartSender*. Your mind will be in coherent alignment with your heart and you will have organisation at a cellular level.

We must always be conscious of the fact that no two people have the same energy signatures and thus the outcome is different for each person.

Tesla's HeartSender comes in 7 pieces and fits together like a jigsaw.

It has a Small Oyster in the centre with 6 Small Spirit Plates in the outer corners. These are made specifically to work in this configuration and under no circumstances can they be separated.

Tesla's HeartSender is a lovely place to meditate.

This little device is truly amazing.

"Gentle and yet forceful" is the only description we have for Tesla's HeartSender.

Once you have the heart-mind coherence the level of connectedness to yourself and others is amazing.

Among the many benefits of personal coherence are; increased composure, more energy, clear thinking, enhanced immune system.

From a physics perspective, when we are in a coherent state, virtually no energy is wasted because there is synchronisation between the heart and mind.

One of the simplest and quickest paths to personal heart coherence is through the 'Tesla's HeartSender'.

The energy of Tesla's HeartSender's is similar but on a mini scale to that of the

Tesla's LightChamber.

For more in-depth understanding of how the heart and brain communicate there are many scientific research publications.

Ask us for more information

It has long been a dream of both Tesla's and Christopher Lewin, to have people around the world in heart-focused intention to help facilitate the shift in global consciousness from instability and discord to balance, cooperation and enduring global peace.

The HeartMath Institute in the US has been studying heart-mind coherence for over 20 years and researching physiological coherence with harmonious connectedness.

We now have the Tesla's HeartSender to experience their research.
