

TABLET-LAPTOP TAG SET

As more & more people are using tablets & laptop computers & not using the desktop computer, Tesla's has developed the **Tablet-Laptop Tag Set**.

The new tablets and laptops that are being sold these days are very efficient & emit very strong EMFs.

As most people have these devices on their lap while using them there is a real problem even though the emissions cannot be felt or seen.

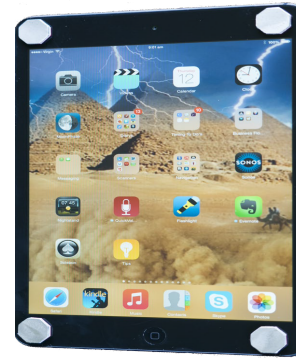

The **Tablet-Laptop Tag Sets** were developed to affect or treat both the device & the person using the device.

Tesla's Phone Tag, (*developed for Mobile/Cell & Cordless Phones*) are very focused in one area.

The **Tablet-Laptop Tag Set** is **not focused** & spreads it's energy equally on both sides, - *hence the reason why the device needs 4*.

At present there is no other use for these Tags but on tablets or laptops.
